

<b>TRADEMARK TRIAL AND APPEAL BOARD</b>
<b>XML DTD ELEMENT MAPPING DOCUMENTATION (V1.0)</b>

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<ttab-proceedings>		The <ttab-proceedings> element is mandatory and will occur one time identifying the beginning of a daily Trademark Trial and Appeal Board Proceeding Information. Contains extracted Trademark Trial and Appeal Board Proceeding Information per the specified extraction date and action key (weekly/annual extraction type). Data group containing the extraction type, extraction date, and zero or more TTAB proceedings. <ttab-proceedings> start and </ttab-proceedings> end tags.
<version>		The <version> element is mandatory and will occur one time between the <version> start and </version> end tags identifying the version number and version date of the Trademark Trial and Appeal Board DTD. The version element will contain one occurrence of the version number and version date elements.
<version-no>		The <version-no> element is mandatory and will occur one time between the <version-no> start and </version-no> end tags containing the version number of the Trademark Trial and Appeal Board DTD. Example: the first production version will be 1.0
</version-no>		
<version-date>		The <version-date> element is mandatory and will occur one time between the <version-date> start and </version-date> end tags containing the date of the Trademark Trial and Appeal Board DTD, an 8-position numeric in the format YYYYMMDD.
</version-date>		
</version>		
	FSEG – Does not exist in XML	FILE SEGMENT – A four position alphanumeric field identifying the file type. Value is always “TKAB”
	KS – Does not exist in XML	KEY SEQUENCE – A six position numeric field right justified with leading zeros. The contents of this field will be the record count within each proceeding number.
<action-key-code >	KA	The <action-key-code> element is mandatory and will occur one time between the <action-key-code> start and </action-key-code > end tags. A 2-position alphanumeric field defining the type of file extract. Valid types are: “DA” for the daily extract and “AN” for the annual extract.
</action-key-code >		
	RECORD-TYPE - Does not exist in XML	A four position alphabetic field identifying the type of record. All TTAB records will be identified with a “TTAB” value within this field.
<transaction-date>	TRANSACTION-DATE	The <transaction-date> element is mandatory and will occur one time between the <transaction-date> start and </transaction-date> end tags identifying the beginning of the TTAB xml file. The <transaction-date> is the date that the data was extracted. An 8-position numeric field in the format YYYYMMDD.
</transaction-date>		
TTAB PROCEEDINGS (PROCEEDING INFORMATION) SECTION		
<proceeding-information>	(APPH)	The <proceeding-information> element is mandatory and will occur one time between the <proceeding-information> start and </proceeding-information> end tags. Contains the proceeding information for all extracted entries. Data group containing one or more PROCEEDING ENTRY elements.

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<data-available-code>		The <data-available-code> element is optional and will occur zero or 1 times between the <data-available-code> start and </data-available-code> end tags. Indicate if data is available.
</data-available-code >		
<proceeding-entry>	(APPH)	The <proceeding-entry> element is optional and will occur one or more time between the <proceeding-entry> start and </proceeding-entry> end tags. Contains a single PROCEEDING_ENTRY definition. Data group containing the proceeding number, proceeding type, filing date, status, status date, purge indicator, prosecution history and party data related to a specific proceeding.
PROCEEDING INFORMATION (PROCEEDING ENTRY) SECTION		
<number>	PRCDNG-NUM	<p>The &lt;number&gt; element is optional and will occur zero or more time between the &lt;number&gt; start and &lt;/number&gt; end tags. Uniquely identifies the particular proceeding in which an application is involved. Assigned by the Trademark Trial and Appeal Board (TTAB).</p> <p>An 8-position numeric field consisting of the following in positions 1-2:            “70”-“74” for *Ex Parte Appeal            “91” for Opposition            “92” for Cancellation            “93” for Interference            “94” for Concurrent Use            Positions 3-8 will contain a six position sequential counter right justified with leading zeros.            *For Ex Parte Appeals, positions 3-8 will contain the serial number of the application as the proceeding number</p>
</number>		
<type-code>		<p>The &lt;type-code&gt; element is optional and will occur zero or more time between the &lt;type-code&gt; start and &lt;/type-code&gt; end tags. Indicates the type of proceeding.</p> <p>A 3-position alphanumeric field indicating the type of proceeding.</p> <p>Valid types are:            “EXT” for Extensions of Time to Oppose            “OPP” for Oppositions            “CAN” for Cancellations            “CNU” for Concurrent Use            “EXA” for Ex Parte Appeal</p>
</type-code>		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<filing-date>	DT-FIL	The <filing-date> element is optional and will occur zero or more time between the <filing-date> start and </filing-date> end tags. The date on which the adversary proceeding was filed. An 8-position numeric field in the format YYYYMMDD. This field contains the date on which the adversary proceeding was filed.
</filing-date>		
<employee-number>		The <employee-number> element is optional and will occur zero or more time between the < employee-number > start and </employee-number > end tags. A 5-position numeric field which assigned to the proceeding case. Is the Employee Number of Interlocutory Attorney.
</employee-number>		
<interlocutory-attorney-name>		The <interlocutory-attorney-name> element is optional and will occur zero or more time between the <interlocutory-attorney-name> start and </interlocutory-attorney-name> end tags. This tag represents interlocutory attorney name who assigned to the proceeding case.
</interlocutory-attorney-name>		
<location-code>		The <location-code> element is optional and will occur zero or more time between the <location-code> start and </location-code > end tags. A 3-position alphanumeric field represents the location of physical proceeding case.
</location-code>		
<day-in-location>		The <day-in-location> element is optional and will occur zero or more time between the <day-in-location> start and </day-in-location> end tags. This tag represents a date which is charged to location.
</day-in-location>		
<charge-to-location-code>		The <charge-to-location-code> element is optional and will occur zero or more time between the <charge-to-location-code> start and </charge-to-location-code> end tags. This tag represents a number that is used to uniquely identify a location. It defines the location that the proceeding number charged to.
</charge-to-location-code>		
<charge-to-employee-name>		The <charge-to-employee-name> element is optional and will occur zero or more time between the <charge-to-employee-name> start and </charge-to-employee-name> end tags. This tag represents the name of the employee that the physical proceeding case. It defines the employee name that the proceeding number charged to.
</charge-to-employee-name>		
<status-update-date>	DT-STAT	The <status-update-date> element is optional and will occur zero or more time between the <status-update-date> start and </status-update-date> end tags. The date that the status was last updated. An 8-position numeric field in the format YYYYMMDD.
</status-update-date>		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<status-code>	STAT	<p>The &lt;status-code&gt; element is optional and will occur zero or more time between the &lt;status-code&gt; start and &lt;/status-code&gt; end tags. Indicates the prosecution status of a proceeding.</p> <p>A 2-position alphanumeric field indicating the prosecution status of a proceeding.</p> <p>Contains one of the status codes listed below:</p> <p>“1” for Not Instituted  “2” for Pending  “3” for Ready for Final Decision  “4” for Awaiting Expir. Of Appeal Period  “5” for Pending Reconsideration  “6” for Pending Reinstatement  “7” for Pending Court Appeal  “8” for Suspended  “9” for Terminated  “A” for Consolidated Opposition  “B” for Opposition Dismissed as a Nullity  “C” for Cancellation Dismissed as a Nullity  “D” for CU Dissolved as a Nullity  “E” for Interference Dissolved as a Nullity  “F” for Extension Not Filed  “G” for Opposition Not Filed  “H” for Extension Filed Late  “I” for Opposition Filed Late  “J” for Premature Extension  “K” for Premature Opposition  “L” for Opposition Refused  “M” for Forwarded to Issuance of Reg/NOA  “N” for Appeal Not Entertained  “O” for Abandoned After Publication  “P” for Notice of Institution Vacated</p>
</status-code>		
PROCEEDING ENTRY (PARTY INFORMATION) SECTION		
<party-information>	(PART) (PARX) (PARC)	<p>The &lt;party-information&gt; element is optional and will occur zero or more time between the &lt;party-information&gt; start and &lt;/party-information&gt; end tags. PARTY information for all parties associated with the proceeding entry.</p> <p>Data group containing one or more PARTY identifications.</p>
<party>	(PART) (PARX) (PARC)	<p>The &lt;party&gt; element is optional and will occur zero or more time between the &lt;party&gt; start and &lt;/party&gt; end tags. A single PROCEEDING_ENTRY PARTY definition that identifies an individual and/or organization.</p> <p>Data group containing the party’s name, role, company/organization, address, and property information.</p>
PARTY INFORMATION (PARTY) SECTION		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<identifier>		The < identifier > element is optional and will occur zero or more time between the < identifier > start and </ identifier > end tags. This tag represents up to 8-position numeric field that generated by the system which identifies the party
</identifier>		
<role-code>	(PART)ENT-NUM	<p>The &lt;role-code&gt; element is optional and will occur zero or more time between the &lt;role-code&gt; start and &lt;/role-code&gt; end tags. Indicates the type of PARTY involved in the proceeding.</p> <p>A 1-position alphanumeric field indicating the type of party involved in the proceeding.</p> <p>Valid roles are:            “P” for Plaintiff            “D” for Defendant</p>
</role-code>		
<name>	(PART) NAM-1	The <name> element is optional and will occur zero or more times between the <name> start and </name> end tags. The name element, a 40-position alphanumeric field, it will contain the first 40 characters of the party name that is involved in the proceeding,
</name>		
<orgname>	(PART) NAM-2  (PART) NAM-3	<p>The &lt;orgname&gt; element is optional and will occur zero or more time between the &lt;orgname&gt; start and &lt;/orgname&gt; end tags.</p> <p>It concatenates between company and organization</p> <p>Organization and orgname are overflow fields for the Party Name. Instead of saying Party Name Line 2 and Party Name Line 3, we use Company, and Organization to help our users divide/organize party names that are extremely long.</p> <p>1.Company name address description            2.The organization of the party that is involved in the proceeding.</p> <p>In general, the only contents of these fields are overflow text of the party name.</p>
</orgname>		
	(PART)ADDR-1 - Does not exist in XML	A forty position alphanumeric field. This field will contain the first 40 characters of the Owner Internal Address within the Address Information.
	(PART)ADDR-2 - Does not exist in XML	A forty position alphanumeric field. This field will contain the first 40 characters of the Owner Street Address within the Address Information.
	(PART)CITY - Does not exist in XML	A forty position alphanumeric field. This field contains the city of origin designation of an address
	(PART)STE/CTRY - Does not exist in XML	A three position alphanumeric field containing the State/Country Code within the Address Information. The country will appear as a three character code followed ;by a space. Reference Attachment 1 – State/Country Codes.
	(PART)ZIP-CD - Does not exist in XML	A nine position alphanumeric field containing the U.S. Postal Zip code or a foreign country postal identification. The appearance of data in this field will be left justified with trailing spaces, if required.
	(PART)FA1 - Does not exist in XML	<p>A one position alphabetic field. A “T” in this field would indicate that the Internal-Address within the Address Information contains more than 40 characters and the remaining overflow characters will appear in a PARX record.</p> <p>An “F” indicates the Internal-Address is 40 characters or less.</p>

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
	(PART)FA2 - Does not exist in XML	A one position alphabetic field. A “T” in this field would indicate that the Street within the Address Information contains more than 40 characters and the remaining overflow characters will appear in a PARX record. An “F” indicates the Internal-Address is 40 characters or less.
	(PART)FCS - Does not exist in XML	A one position alphabetic field. A “T” in this field would indicate that a Composed of Statement appears as a PARX record for this mark. An “F” indicates that a Composed of Statement does not appear.
	(PART)FDA - Does not exist in XML	A one position alphabetic field. A “T” in this field would indicate that an DBA/AKA Statement appears as a PARX record for this mark. An “F” indicates that an DBA/AKA Statement does not appear.
	(PART)FNT - Does not exist in XML	A one position alphabetic field. A “T” in this field would indicate that Name within the PART Information contains more than 3 lines (120 characters) and the overflow appears as a PARX record. An “F” indicates that the Name is within 3 lines.
	(PARX) DATA GROUP - Does not exist in XML	A fifty-position alphanumeric group containing the following three fields: Text Type, Entry Number, and Text. The data group may have up to five occurrences per PARX record. Unused positions will contain spaces.
PARTY (PROPERTY INFORMATION) SECTION		
<property-information>	(APNR)	The <property-information> element is optional and will occur zero or more time between the <property-information> start and </property-information> end tags. Property identification for all PARTY related properties. Data group containing one or more PROPERTY data related to a specific PARTY.
<property>	(APNR)	The <property> element is optional and will occur zero or more time between the <property> start and </property> end tags. Property item identification. Data group containing the application serial number, trademark registration number (if registered) and mark name of the property.
PROPERTY INFORMATION (PROPERTY) SECTION		
<identifier>		The< identifier > element is optional and will occur zero or more time between the < identifier > start and </ identifier > end tags. This tag represents up to 8-position numeric field that generated by the system which identifies the property.
</identifier>		
<serial-number>	(APNR)DATA GROUP - SER- NUM	The <serial-number> element is optional and will occur zero or more time between the <serial-number> start and </serial-number > end tags. The number assigned to a trademark application upon initial filing at the PTO. An 8-position numeric field with leading zeroes containing the number assigned to a trademark application upon initial filing at the PTO.
</serial-number>		
<registration-number>	(APNR) DATA GROUP - REG- NUM	The <registration-number > element is optional and will occur zero or more time between the <registration-number> start and </ registration-number> end tags. The number assigned to a trademark application when the mark is officially registered. This is the registration number of the mark cited in the adversary proceeding.  A 7-position numeric field with leading zeroes containing the number assigned to a trademark application when the mark is officially registered.
	(APNR) DATA GROUP – PARTY ENTRY NUMBER – Does not exist in XML	An eighteen position numeric item containing two fields as defined below. A group may occur 16 times for each APNR record. Unused occurrences will contain spaces.
</registration-number>		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<mark-text>	(TTAX) DATA GROUP	The<mark-text> element is optional and will occur zero or more time between the <mark-text> start and </mark-text> end tags. Contains a textual description of a party's property. It is used primarily when a Plaintiff does not have a Registered Mark (thus no registration number) but does have a Mark.  A 50-position alphanumeric field containing a textual description of a party's property.
</mark-text>		
</property>		
</property-information>		
PARTY (ADDRESS INFORMATION) SECTION		
<address-information>	(PART) (PARC)	The<address-information> element is optional and will occur zero or more time between the <address-information> start and </ address-information> end tags. All addresses defined for PARTY. Data group containing one or more ADDRESS elements.
<proceeding-address>	(PART) (PARC)	A single PARTY address. Data group containing the address type, name, company, and mail address information.
ADDRESS INFORMATION (PROCEEDING ADDRESS) SECTION		
<identifier>		The< identifier > element is optional and will occur zero or more time between the < identifier > start and </ identifier > end tags. This tag represents up to 15-position numeric field that generated by the system which identifies the address
</identifier>		
<type-code>		The<type-code> element is optional and will occur zero or more time between the <type-code> start and </type-code> end tags. Indicates the type of address. A 1-position alphanumeric field indicating the type of address. Valid types are: "O" for Owner "C" for Correspondent
</type-code>		
<name>	(PARC) CORR-ADDR(1)	The <name> element is optional and will occur zero or more time between the <name> start and </name> end tags. The name of the address that is involved in the party. A 150-position alphanumeric field containing the complete name of the address that is involved in the party.
</name>		
<orgname>	(PARC) CORR-ADDR(2)	The <orgname> element is optional and will occur zero or more time between the <orgname> start and </orgname> end tags. It concatenates between company and organization.
</orgname>		
<address-1>	(PARC) CORR-ADDR(3)	The<address-1> element is optional and will occur zero or more time between the <address-1> start and </address-1> end tags. Street address information. A 100-position alphanumeric field containing the street address. <b>Note: The &lt;address-1&gt; tags may contain the concatenated content of the TWTF/PARC record COOR-ADDR(3) through COOR-ADDR(5) fields.</b>
</address-1>		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<city>	(PARC) CORR-ADDR(4) CORR-ADDR(5)	The<city> element is optional and will occur zero or more time between the <city> start and </city> end tags. City or other foreign designation address description. A 40-position alphanumeric field containing the city or foreign designation of an address.
</city>		
<state>	(PARC) CORR-ADDR(4) CORR-ADDR(5)	The<state> element is optional and will occur zero or more time between the <state> start and </state> end tags. The state identification. A 2-position alphanumeric field containing the State code within the Address Information.
</state>		
<country>	(PARC) CORR-ADDR(4) CORR-ADDR(5)	The<country> element is optional and will occur zero or more time between the <country> start and </country> end tags. Contains the address country code. A 2-position alphanumeric field containing the code that represents the officially designated country as prescribed by the World Intellectual Property Organization (WIPO) Standard ST.3.
</country>		
<postcode>	(PARC) CORR-ADDR(4) CORR-ADDR(5)	The<postcode> element is optional and will occur zero or more time between the <postcode> start and </postcode> end tags. The U.S. Postal Zip code or a foreign country's postal identification. A 20-position alphanumeric field containing the U.S. Postal Zip code or a foreign country's postal identification.
</postcode>		
	(PARC)PARTY ENTRY NUMBER – Does not exist in XML	A three-position numeric field. This field contains the entry number of the owner in the PART record.
</proceeding- address>		
</address- information>		
</party>		
</party- information>		
PROCEEDING ENTRY (PROSECUTION HISTORY) SECTION		
<prosecution- history>	(APPH)	The< prosecution-history > element is optional and will occur zero or more time between the < prosecution-history > start and </ prosecution-history > end tags. Prosecution identification for all entries related to the specified proceeding. Data group containing one or more PROSECUTION ENTRY data related to a specific proceeding.
<prosecution- entry>	(APPH)	The< prosecution-entry > element is optional and will occur zero or more time between the < prosecution-entry > start and </ prosecution-entry > end tags. A single prosecution history event for a specific proceeding. Data group containing the entry code, entry type, date due and entry date pertaining to a specific prosecution entry event.
PROSECUTION HISTORY (PROSECUTION ENTRY) SECTION		
<identifier>	(APPH) DATA GROUP - ENT- NUM	The< identifier > element is optional and will occur zero or more time between the < identifier > start and </ identifier > end tags. This tag represents up to 3-position numeric field that generated by the system which identifies the prosecution history event.
</identifier>		

TTAB PROCEEDINGS SECTION		
XML Elements	TWTF Elements	Description
<code>	(APPH) DATA GROUP - ENT-CD	The<code > element is optional and will occur zero or more time between the <code > start and <code > end tags. A code identifying the nature of the specific prosecution history event. Not to exceed 4-position alphanumeric field containing a code which identifies the nature of the specific prosecution history event. REFERENCE TABLE 1 – TTAB ENTRY-CODE
</code>		
<type-code>	(APPH) DATA GROUP - ENT-TYPE	The <type-code> element is optional and will occur zero or more time between the <type-code> start and </type-code> end tags. A 1-position alphanumeric field indicating the type of prosecution history event. REFERENCE TABLE 1 – TTAB ENTRY-CODE
</type-code>		
<due-date>	(APPH) DATA GROUP - DT-DUE	The<due-date> element is optional and will occur zero or more time between the <due-date> start and </due-date> end tags. The date on which the action is due. An 8-position numeric field in the format
</due-date>		
<date>	(APPH) DATA GROUP - DT-ENT	The<date> element is optional and will occur zero or more time between the <date> start and </date> end tags. The date that the entry becomes effective. An 8-position numeric field in the format YYYYMMDD that indicates the date the entry becomes effective. This is the mailroom date (for incoming correspondence) and the mailing date (for outgoing correspondence).
</date>		
<history-text>		The< history-text > element is optional and will occur zero or more time between the < history-text > start and </ history-text > end tags. The text associated with an event. Not to exceed a 100-position alphanumeric field containing the text associated with an event.
</history-text>		
</prosecution-entry>		
</prosecution-history>		
</proceeding-entry>		
</ttab-proceedings>
